

Sublitex Collection

Cotton Sub 270 FR

270g/m² Universal Cotton Canvas for Dye Sublimation, Latex or UV. An excellent choice as an environmentally friendly fiber throughout its entire product life cycle. Since cotton is made by nature, it can be biodegraded by nature. The speed that cotton degrades depends on the environmental conditions and the construction of the fabric, however it will degrade over time. As an example, the lifespan of a cotton glove in a Landfill is about 3 months and a cotton t-shirt is about 6 months. Since Cotton Sub 270 FR is a recent product, we are still under testing to know approximately the lifespan per square meter of our product.

Material: 78% COTTON / 22% RESIN

Weight: 270 g/m²

Features:

- Biodegradable
- High quality colour reproduction
- No fraying

Applications:

- Art reproduction
- Indoor decoration
- Frames

Product attributes:

- Transfer and direct dye sublimation
- Compatibility with UV and Latex Inks
- FR certification – B s2 d0
- Up to 3 meters
